

Lairdmannoch Energy Park

AI Figure 5-7
Visual Receptor Locations with Zone
of Theoretical Visibility - Screened

- Key**
- Proposed Development - 149.9m to Blade Tip
 - Proposed Development - 180m to Blade Tip
 - Distance Radii from Outermost Turbines (5, 10, 15 km)
 - Viewpoints
 - Galloway Tourist Route
 - Red Kite Trail
 - Robert the Bruce Trail
 - South West 300
 - National Cycle Network Route 7
 - Core Paths
- Zone of Theoretical Visibility to Blade Tip**
- 1 - 3 turbines may be visible
 - 4 - 6 turbines may be visible
 - 7 - 8 turbines may be visible

FIGURE DATA:
This figure has been based on the following data:
Layout file: D006-obvs-BT-T5-15km.shp; D006-obvs-BT-T50-45km.shp
Terrain data: T5-DTM.asc; T50-DTM.asc
Viewer's eye height: 2m
Calculation grid size: 5m (to 15km from turbines)/50m (beyond)

Notes:
This drawing is based upon computer generated Zone of Theoretical Visibility (ZTV) studies produced using the Viewshed routine in the Visibility Analysis plugin for QGIS.
The areas shown are the maximum theoretical visibility, taking into account topography, principal woodlands and buildings. A digital surface model (DSM) has been derived from OS Terrain 5/50 height data with the locations of woodland and buildings taken from the OS Open Map Local dataset. Buildings have been modelled with an assumed height of 7.5m and woodland an assumed height of 15m, representing a conservative estimate of average heights within the study area.
The model does not take into account some localised features such as small copses, hedgerows or individual trees and therefore still gives an exaggerated impression of the extent of visibility. The actual extent of visibility on the ground will be less than that suggested by this plan.
The ZTV includes an adjustment that allows for Earth's curvature and light refraction. It is based on a derived DTM and has a 5m² (to 15km from turbines) / 50m² (beyond) resolution.

Scale @ A3:
