AI AELSQ 5-5-5
Zone of Theoretical Visibility of
Access Route - Bare Earth

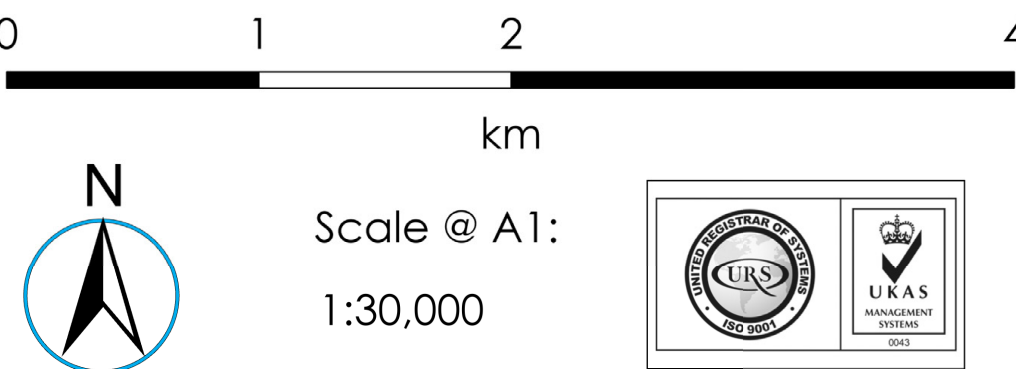

- Key**
- Proposed Access Route
 - Proposed Development - 149.9m to Blade Tip
 - Proposed Development - 180m to Blade Tip
 - Distance Radii from Access Route (5, 10 km)
 - Viewpoints
 - Fleet Valley National Scenic Area
 - SLQ Landscape Zones
- Zone of Theoretical Visibility**
- Up to 15% of access route may be visible
 - Up to 30% of access route may be visible
 - Up to 45% of access route may be visible
 - Up to 60% of access route may be visible

Figure Data:
This figure has been based on the following data:
Layout file: D005-obvs-access-15-10km.ahp
Terrain data: T5-DTM.asc
Viewer's eye height: 2m
Calculation grid size: 5m

Notes:
This drawing is based upon computer generated Zone of Theoretical Visibility (ZTV) studies produced using the Viewshed routine in the Visibility Analysis plugin for QGIS.
The areas shown are the maximum theoretical visibility, taking topography into account.
This visibility map is based on a 'bare earth' model of the landscape and does not show any effects of screening from obstacles such as buildings and vegetation.
The ZTV includes an adjustment that allows for Earth's curvature and light refraction. It is based on a derived DTM and has a 5m² resolution.
