Community Benefit Fund

Should the project be approved, Wind2 will provide a community benefit fund equivalent to £5,000 per megawatt (MW) of installed wind capacity and £500 per megawatt (MW) of installed solar capacity on the site, payable each year of the energy park's operational lifetime.

Based on an installed capacity of approximately 100MW, this would provide up to an annual community benefit fund of £310,000. Assuming an operational lifetime of 30 years, this would translate into a total community benefit fund of up to £9.3million to be invested in local priorities and projects over that period.

We are keen to ensure that the local community derives maximum benefit from the proposed community benefit fund. We therefore invite you to give us your feedback on potential local priorities and projects where you would like to see the fund invested.

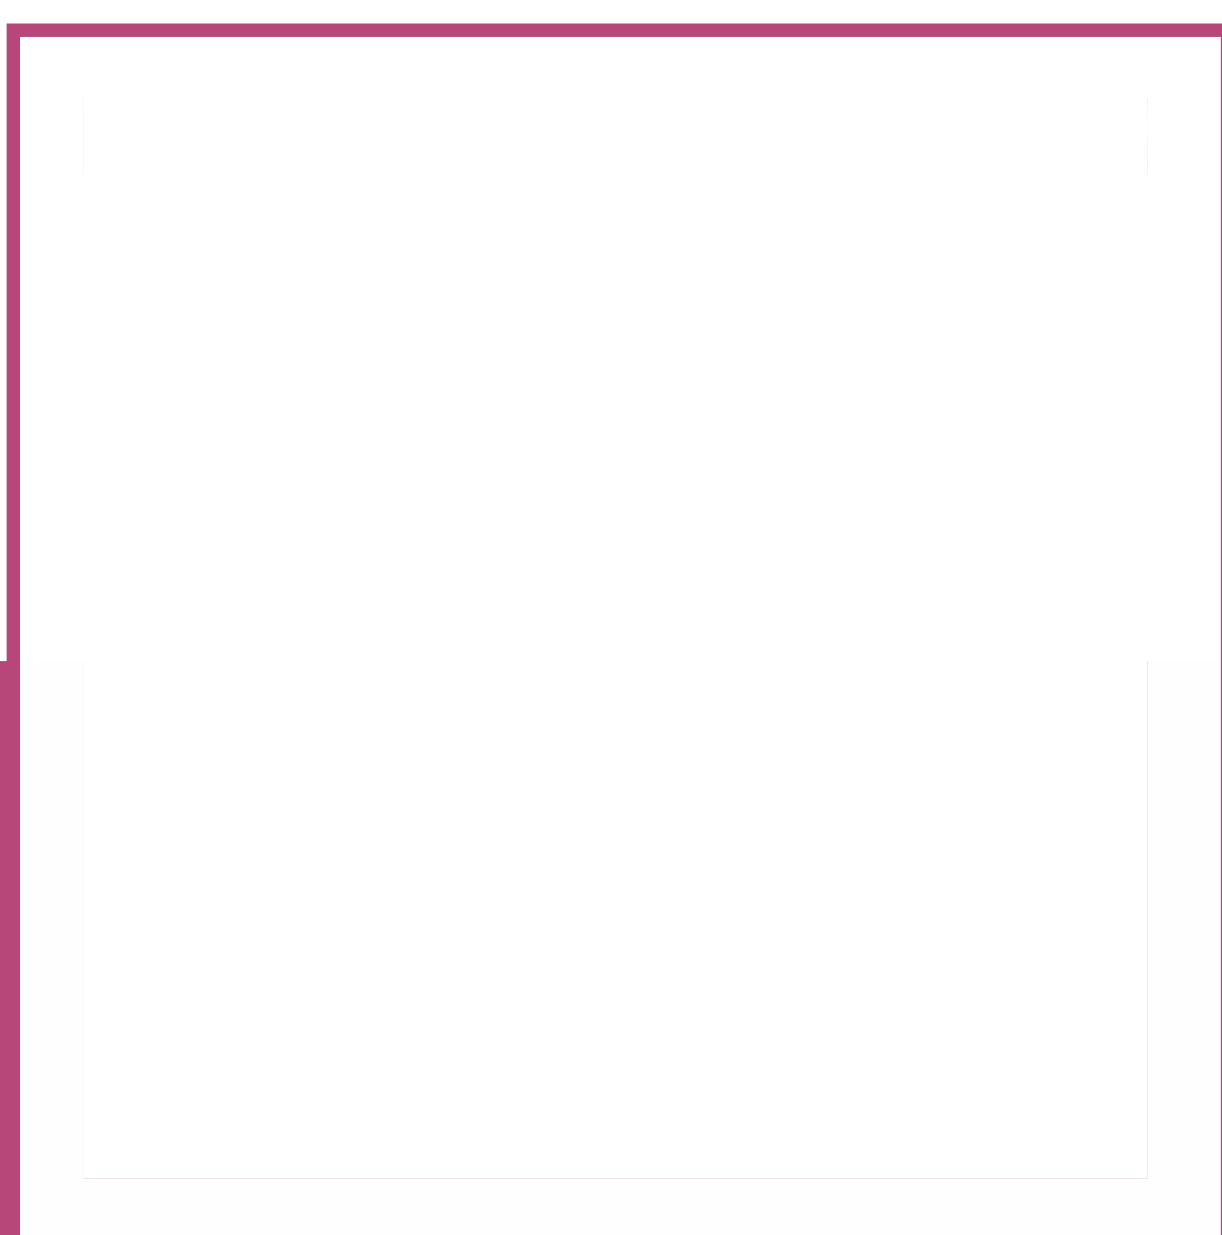

Community Shared Ownership

In addition to this commitment, Wind2 is exploring potential models for community share ownership. This would provide an opportunity for the local communities around the site to acquire up to a 10% stake in the proposed energy park.

Further information regarding community ownership is available at:
www.localenergy.scot

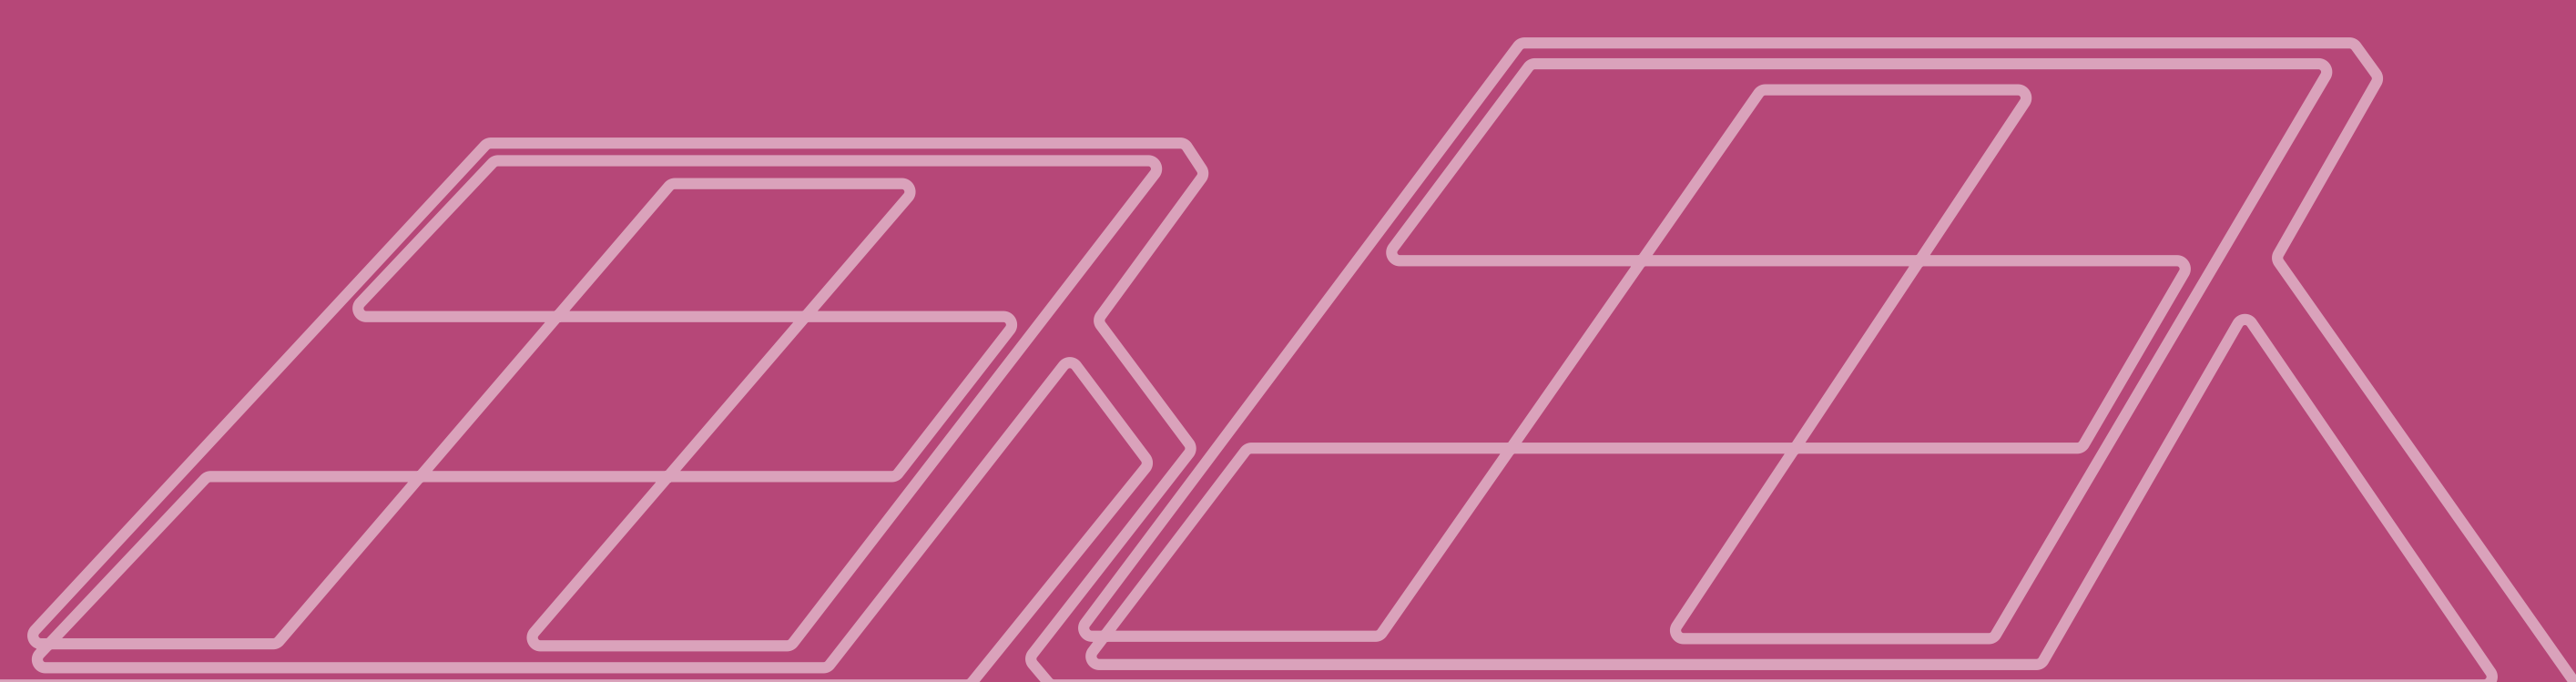

Let us know what you think about these ideas, particularly if you have experience of or are interested in community ownership, via the QR code below.

Timeline

We anticipate submitting plans to the Energy Consents Unit in early 2025.

Public Consultation – September 2024

Analyse Feedback – Autumn 2024

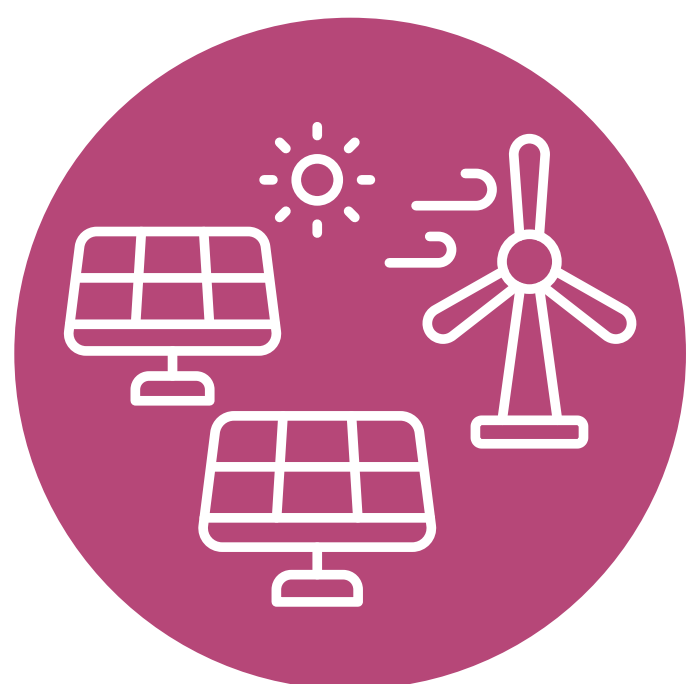

Second round of Public Consultation – Winter 2024

Submit Section 36 Application – Early 2025

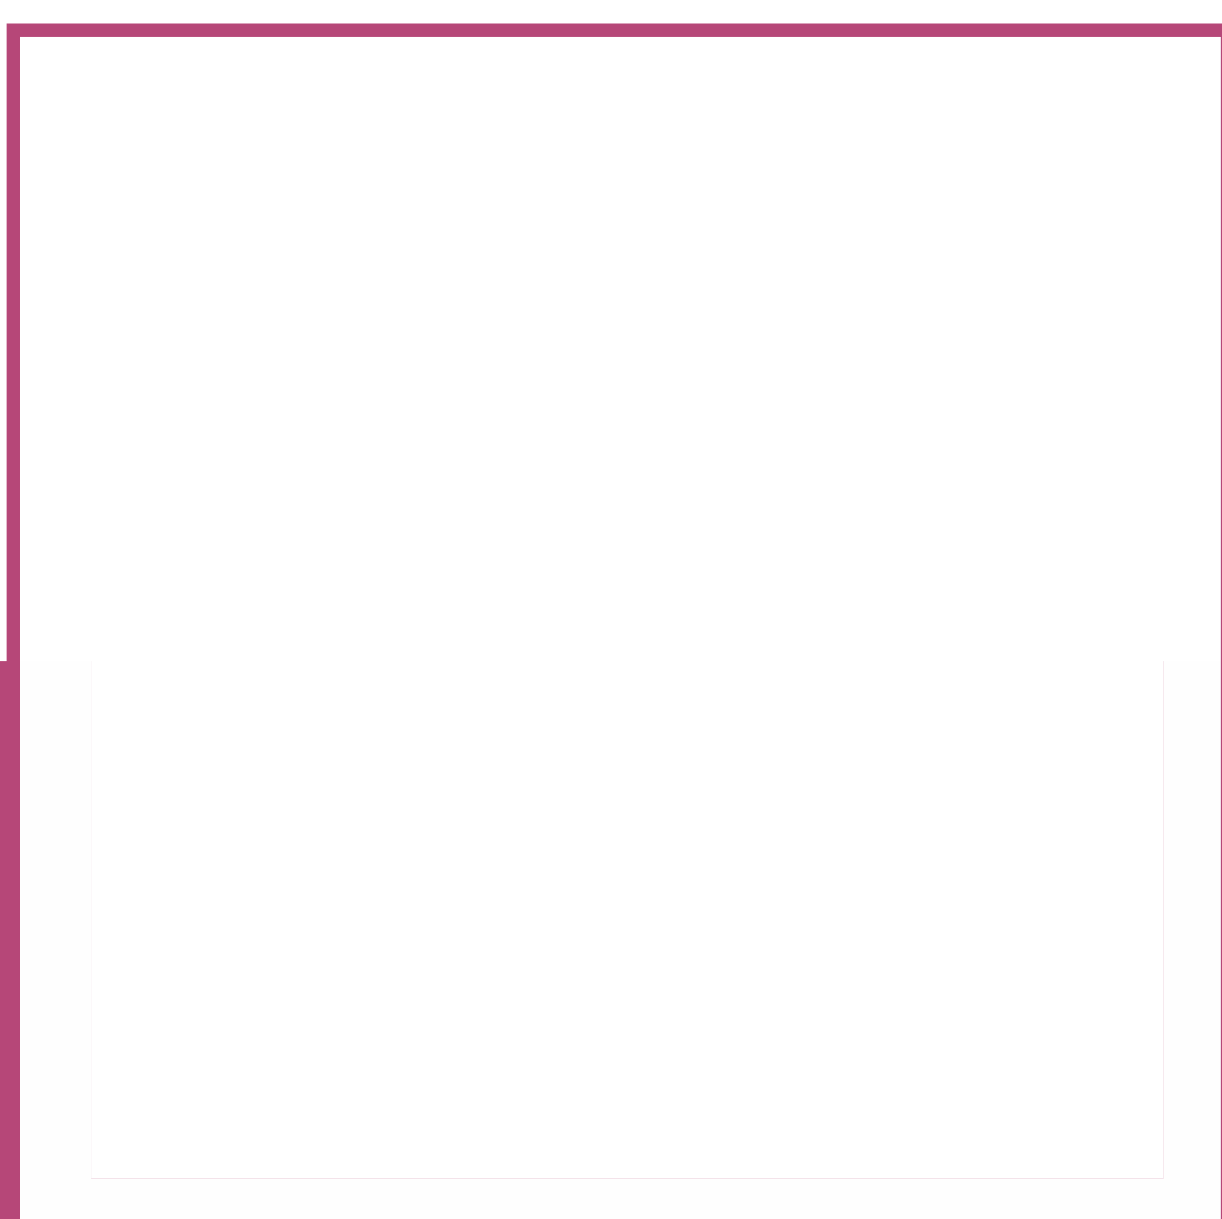

Decision by Scottish Ministers – Early 2026

Energy Park Operational – Autumn 2030

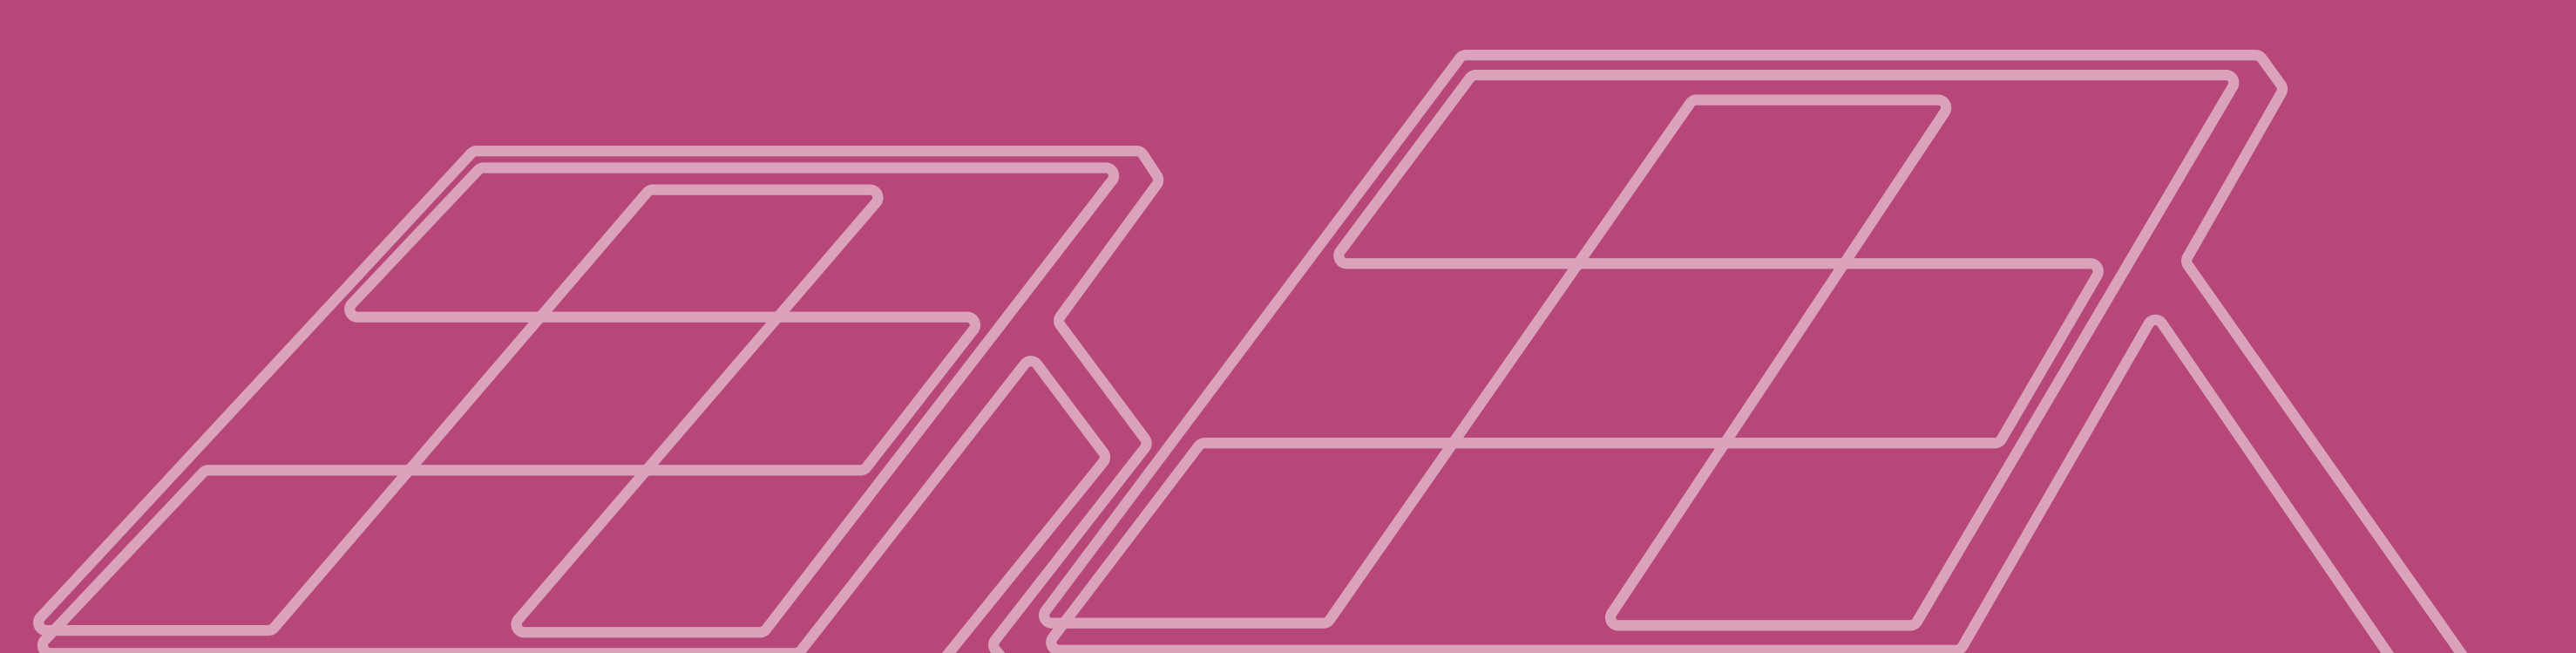

A second round of public exhibitions will be held in Autumn 2024, where the local community will be provided with information on the final proposals prior the submission of the application.

Next Steps

This event is one element of a comprehensive programme of public consultation being undertaken to provide information and collect comments and feedback about draft proposals for the proposed energy park.

Your comments will help improve the quality of our planning submission and inform related proposals for a community benefit fund and potential community ownership models.

We have created a dedicated project website at www.lairdmannockwindfarm.co.uk which will be regularly updated with the latest information about our proposals and the public consultation process.

To give members of the local community sufficient time to give us their thoughts and feedback, we have set a deadline of Friday 27th September 2024 to send us responses.

Feedback QR code:

If you can, please take a few minutes to provide your feedback via the QR code, the tablet or by completing the feedback form. If there's any aspect of the proposed development you'd like to discuss in more detail, please to speak to a member of the project team.

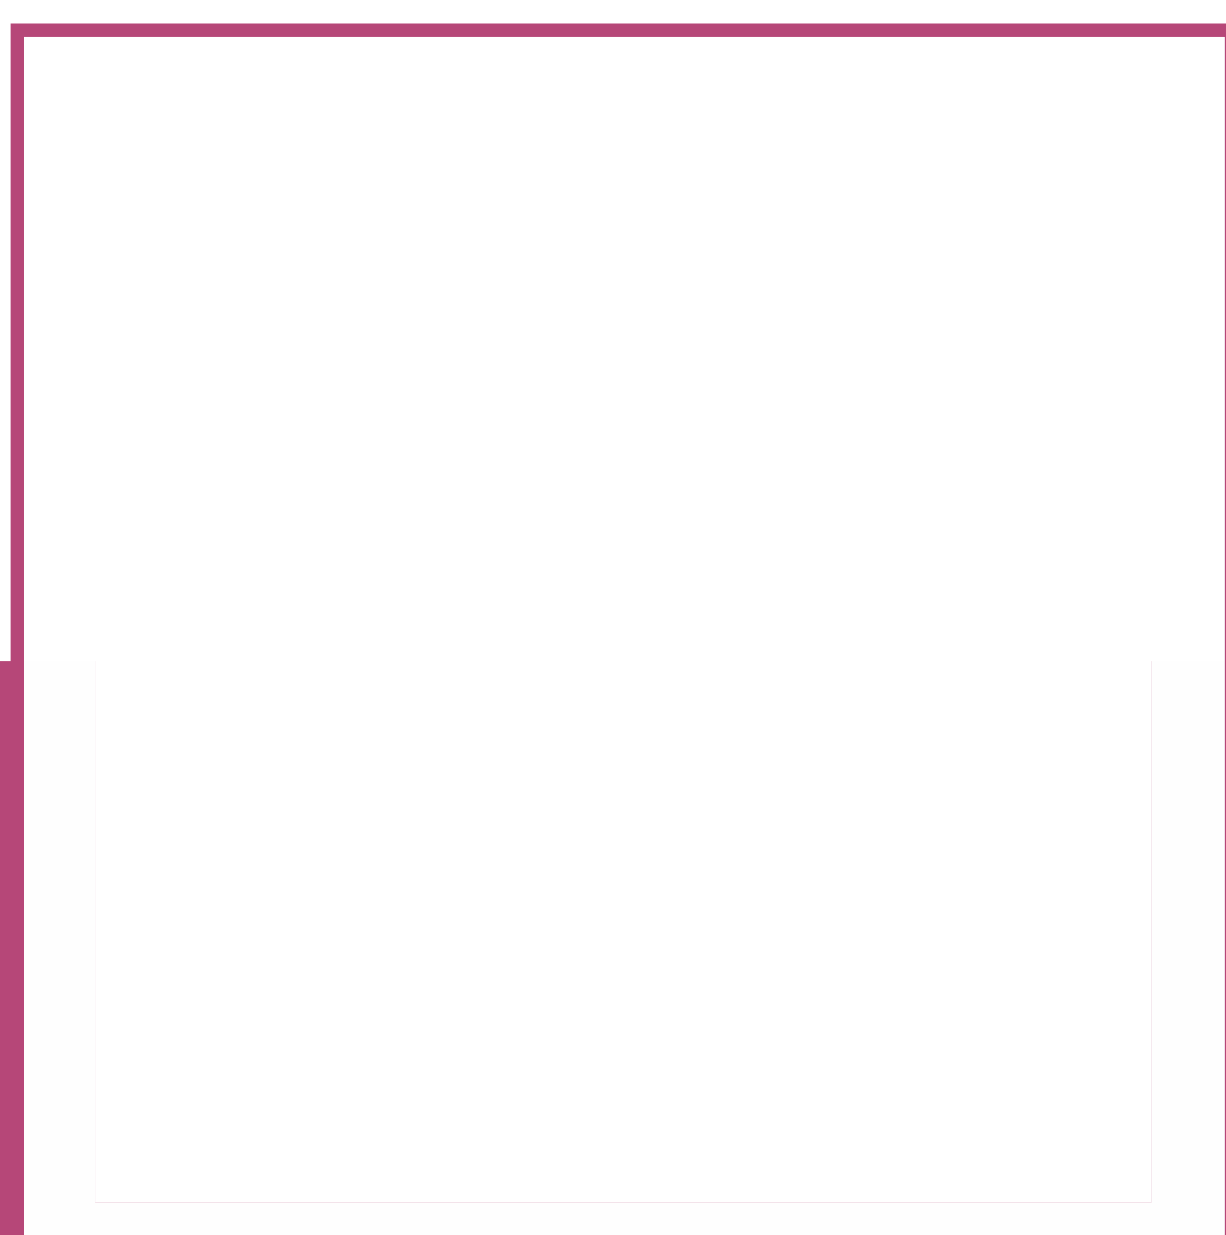

Please note that comments made to Wind2 are not representations made to the Energy Consents Unit or to Dumfries and Galloway Council. There will be the opportunity to make direct representations to the Energy Consents Unit when the planning application is submitted.

You can also complete the feedback form online at:

lairdmannochenergypark.co.uk/feedback

or write to us or send us your completed feedback form via the following address:
Wind 2 Limited, 2 Walker Street, Edinburgh, EH3 7LB.
